Jenkins	Postman	JIRA
Git	Swagger	Azure DevOps

WORK EXPERIENCE

Quality Assurance Analyst *June 2021 - Present*
Essilor Shared Services Philippines, Inc.
- Working with cross-functional teams and involved in all the phases of the software development lifecycle to ensure quality throughout the cycle.
- Defined testcases based on the Story grooming with the business and dev team.
- Developed automated Regression test cases to reduce manual testing time and improve release cycles testing and product quality.
- Worked with the senior automation engineer to integrate regression test cases to CI/CD pipelines.
- Reporting defects and errors to development team in JIRA or DevOps with detailed documentation.
- Performing manual regression testing across different browser, OS and mobile devices using BrowserStack.
- Creating JSON payload to test APIs on different servers using Postman or Swagger.
- Creating SQL Scripts to thorough check and compare data in the database.
- Working with the rest of the QA team to develop effective strategies and test plans.
- Performing and creating negative testcases to ensure the application's capability of handling unexpected user behavior.

Quality Assurance Analyst *August 2018-May 2021*
PCCW Solutions Philippines – *Shared Services Center*
- Involved in complete SDLC experience of the project from business analysis to development, testing, deployment and documentation
- Created and executed 150+ test cases and scripts to uncover, identify and document application problems.
- Performed manual testing in different testing servers
- Performed feasibility analysis on the business requirements
- Analyze defects to create additional test cases to improve test coverage
- Developed SQL scripts to perform backend testing
- Fully responsible for performing regression testing on the 1st phase of the project during phase 2 integration
- Performed browser compatibility testing
- Fully responsible for the defect management/defect testing in phase 1 of the project
- Documentation of test cases and defect reporting.
- Performed test case peer review on teammate's works
- Provided technical support and instruction in UAT

Web App Designer & Developer *February 2018 – August 2018*
PCCW Solutions Philippines – *Shared Services Center*
- Worked closely with the clients, business team, technical lead and developers to create the design for the Business Process Management web app project.
- Created the UX design using UXPin.
- Developed the design using JSF Primefaces, CSS and JavaScript.
- Responsible for the web app's responsive design.
- Responsible for handling and fixing defects related in UI
