PROFILE

Dynamic Application System Engineer with expertise in C#.Net, specializing in driving technological advancements at FUJITSU. Proven ability to lead AI/ML education initiatives on UPWORK, excelling in collaborative projects. Recognized for adaptability and a strong commitment to excellence, aiming to leverage skills in innovative tech environments.

WORK EXPERIENCE

FUJITSU MAR 22 - PRESENT
Application System Engineer

- Designing and maintaining robust software solutions that drive business success
- My proficiency in system architecture and my ability to navigate complex codebases have been instrumental in delivering high-quality applications

UPWORK NOV 2023 - FEB 2024
Freelance AI Coding Talent

- As an AI/ML Coding Trainer, I've embraced the transformative power of artificial intelligence and machine learning
- By educating aspiring coders and professionals, I've not only shared my knowledge but also stayed at the forefront of technological advancements, continuously learning and adapting to the ever-evolving landscape of AI/ML

ACCENTURE AUG 2018 - MAR 2022
Data Analyst/SME

- I honed my eye for detail and developed an acute sense of digital responsibility, ensuring that online spaces remain safe and constructive.
- I was promoted to an SME role, where I handle knowledge transfer, quality assurance, training and development, problem-solving with my subordinates, process improvement, and client interaction.

EDUCATION

**Bachelor of Science|Information Technology -
Infrastructure Track** 2014 - 2018
Quezon City University (Former QCPU)
